# WIRELESS

## Light Tube

The Light Tube can be used for a visual stimulus and can be used wirelessly. You can change the speed, color, brightness and mode of the Light Tube, based on the needs of your client. The Light Tube is positioned on a fixed base in which the Pulsators can be charged.

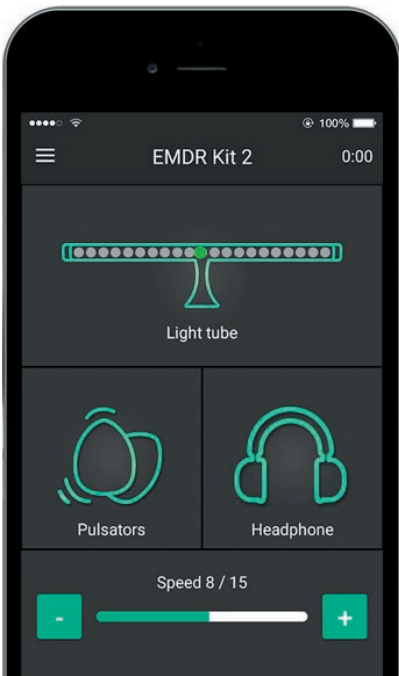

## Headphone

With the wireless Headphone you can apply an auditory stimulus. You can for example use this when the client finds it difficult to follow the light point on the Light Tube or if additional stimulation is needed. In the app you can adjust the volume and choose between different sounds.

## Pulsators

Apply a tactile stimulus with the wireless Pulsators. You can use them together with the Light Tube and Headphone, but you can also use them separately. The intensity and speed of the pulsation can easily be adjusted through the app.

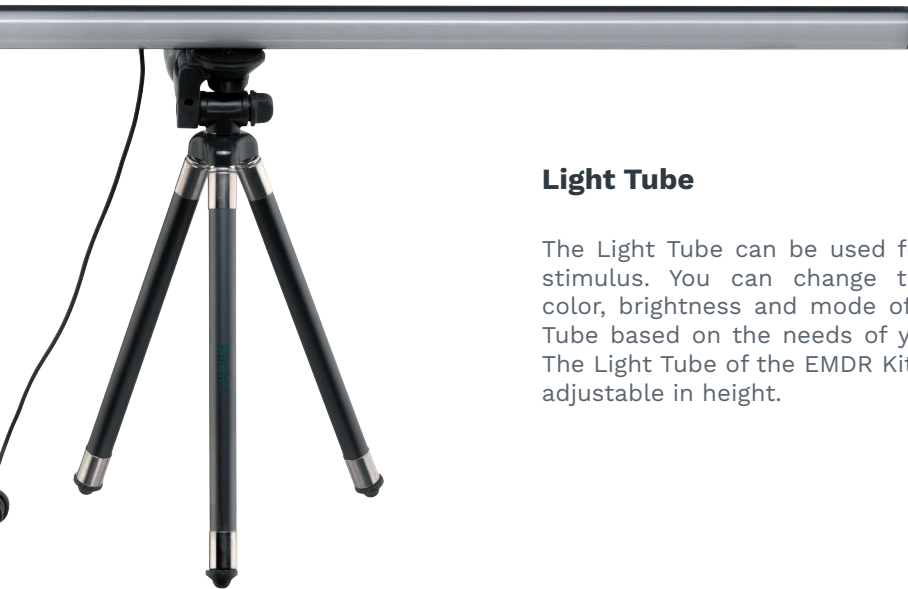

## EMDR Kit App

Every part of the EMDR Kit Wireless is controllable with the EMDR Kit app that you can download on your smartphone or tablet (iOS or Android).

Download the free EMDR Kit app in the Google Play Store (Android) or in the App store (iOS).

# CLASSIC

## Light Tube

The Light Tube can be used for a visual stimulus. You can change the speed, color, brightness and mode of the Light Tube based on the needs of your client. The Light Tube of the EMDR Kit Classic is adjustable in height.

## Headphone

With the Headphone you are able to apply an auditory stimulus. You can do this, for example, when more stimulation is needed or when the client finds it hard to follow the light on the Light Tube. You can choose for irregular sound for extra stimulation.

## Pulsators

The Pulsators can be used for a tactile stimulus. You can use the Pulsators together with the Light Tube and Headphone, but also separately. You can easily change the intensity and speed with the controller.

## Controller

Every part of the EMDR Kit Classic can be controlled with the controller. Connect the modalities that you want to use and you are ready to start. The various settings can easily be adjusted through the buttons on the controller, also during use.

# Comparison

## WIRELESS

### Wireless

The EMDR Kit Wireless is completely wireless and can be controlled with an app that you can download on your smartphone or tablet.

### Controllable with App

The EMDR Kit Wireless works with an app that can control the different components. Easily change the settings such as speed, volume and intensity during use.

### Fixed Base

The EMDR Kit Wireless has a fixed base so that it is always at the right height on a table. It is not adjustable in height or tiltable.

### Extra functions

The EMDR Kit Wireless offers additional functions such as adjustable speed for the individual modalities and more sounds.

## CLASSIC

### Wired

The EMDR Kit Classic is controllable with a controller. All modalities can easily be used by connecting their cables to the controller.

### Controllable with Controller

With the controller you can easily control the Light Tube, Pulsators and Headphone. Settings such as speed, volume and intensity are easy to adjust with the buttons on the controller.

### Adjustable in Height

The EMDR Kit Classic comes with a tripod so that you can adjust the height. You can also change the angle of the Light Tube.

### Foldable

The EMDR Kit Classic is foldable. Therefore, this model is better suited if you plan to travel with the EMDR Kit regularly.
